Subject: Filter Bags -

Matt,

Let's see what the pricing comes in with but for now plan on about 40 bags, and we can split the cost between R n B and GK mines. Also, you have the remainder from last year. That gives us 20 bags for 2 days of operation with – 4 bags per 2 periods of 3 hours operation underground at the R n B.

The Gold King is an unknown as to how much we'll need. However, the initial rock debris removal should not be a significant problem as compared to the R n B spooage problem.

What's your thought ?

Steve
